SUMMARY

An ambitious and committed intern in software engineering with a strong foundation in computer science principles and practical experience gained from both academic and personal projects. I am excited to learn from seasoned engineers and contribute to significant software solutions. I am proficient in the fundamental programming languages and development tools. I am renowned for my ability to solve problems and pay close attention to detail, and I am excited to develop in a creative and cooperative team setting.

EDUCATION

Bsc(Hons) Computer Science
University of Westminster, UK | IIT

Sep 2023 - Present

Level 4 modules

• Mathematics for Computing	88
• Computer Systems Fundamentals	85
• Software Development I	64
• Software Development II	62
• Trends in Computer Science	52
• Web Design and Development	79

Level 5 modules

• Object-Oriented Programming	61
• Database Systems	82
• Software Development Group Project	TBC
• Mobile Application Development	TBC
• Client Server Architecture	TBC
• Human-Computer Interaction (HCI)	73

Royal college colombo -07

2009-2023

- GCE A/L - 3A's - Commerce Stream

TECHINICAL PROJECTS

Real time ticket booking system (2024)

Springboot, Angular, java, MySQL

- This system was designed to give the ability to book tickets for customers and sell tickets for sellers in real-time.

Plane management System(2024)

Java

- Developed a Java-based Plane Management System for managing seat reservations, allowing users to buy, cancel, and search for seats with real-time seating plans.

Android Dice Game Development(2025)

Kotlin

- Designed and developed an interactive Android dice game featuring a computer-controlled opponent, user-selected rerolls, score tracking, and dynamic UI, ensuring smooth gameplay and state retention across device rotations.

InfraTrack (2025)

java, Springboot, Flutter, MongoDB,Python

- Road infrastructure issues like potholes, broken street lights, damaged road signs, and blocked drains impact community safety and daily commutes, with reporting often complicated and inefficient.

Climex website (Group Project)(2024)

Html, CSS, javascript

- Developed a user-friendly, multi-step profile creation interface for ClimeX, guiding users with clear labels, a progress bar, and structured data collection.

Figma UI/UX Project (BOTNICARE)(2025)

Figma

- This system was designed to give the ability to book tickets for customers and sell tickets for sellers in real-time.

Traffic Flow Analysis and Visualization(2025)

Python

- Developed a Python program to analyze and visualize traffic data using CSV processing, statistical analysis, and Tkinter-based histograms.

Exam marks management system(2023)

Python

- Developed a Python app for recording and calculating exam scores, with tools for grade analysis and student access.

EXTRACURRICULAR ACTIVITES

- **Royal College Colombo-07**
 - Royal College Junior Steward 2019
 - Battle Of The Blues Souvenir Committee Member 2018/2019
 - Royal-Trinity Bradby Shield Souvenir Committee Member 2018
 - Member of Interact Club of Royal College 2018/2019
 - Member of UN Club of Royal College 2018/2019
 - Member of Royal College Social Service League 2018

SKILLS

Technical Skills

- Java
- Javascript
- Python
- Html
- Springboot
- Flutter
- Kotlin
- Bootstrap
- Angular
- React
- MySQL
- SQL
- Figma

Soft Skills

- Fast learning skill
- Event handling
- Content Writing
- Time Management
- Effective Communication
- Innovative Thinking
- Leadership and Project
